They have large retractable claws to help them catch food in the wild. They usually eat deer and elk, but will also eat rodents and other small mammals and birds. We feed "Jade" a special exotic feline diet, as well as deer, elk, beef, and other meat scraps. Mountain Lions keep deer populations healthy by culling the sick and weak ones.

Large Mammals  
The prey were often large, roaming animals, such as the bison and mammoth. The movement of animals to feeding grounds meant the hunter-gatherers followed their movements. The number of calories consumed by early humans was largely from the gathering of fruits and berries, around 75 percent to 80 percent of the total consumed calories were from gathering, according to Lake Tahoe Community College.

Bigfoot, also known as Sasquatch, in Canadian folklore and American folklore, is an ape-like creature that is said to inhabit the forests of North America.Supposed evidence of Bigfoot's existence is based on a number of disputed short videos, photographs, visual sightings, casts of large footprints, etc.

Bigfoot - Wikipedia  
Hunting is the practice of seeking, pursuing and capturing or killing wild animals. Hunting wildlife or feral animals is most commonly done by humans for meat, recreation, to remove predators that can be dangerous to humans or domestic animals, to remove pests that destroy crops or kill livestock, or for trade. Many non-human species also hunt - see predation.

Archaeological excavations at the site of Wilamaya Patjxa in the high Peruvian Andes have revealed a 9,000-year-old female burial associated with a big-game hunting toolkit.

The Valley Bisa people inhabit the Luangwa Valley in central Zambia. Among them, the hunter, who tracks such large game as the lion, elephant, and buffalo, commands great respect and esteem from the other members of the lineage who traditionally rely on him for their subsistence and protection. Although the social organization and technology of the Bisa people have undergone tremendous change in the last one hundred years, the role of hunter retains its social importance, and the legitimizing hunting rituals have their roots in local history. Drawing on data collected during his fieldwork among the Bisa continuing since the 1960s, Stuart Marks describes the changes that have occurred in hunting patterns, the sociological variables that govern an individual's decision to become a hunter, and the common cosmological convictions that hunters bring to their profession. Available for the first time in paperback, the new introduction and afterword to this edition reflect on methodological and ideological changes in the anthropological study of African peoples as well as updating the circumstances of the Bisa people since the book's first appearance in 1976. Through the interventions of the larger national society the Bisa have lost much of their land and access to important portions of their resources while experiencing repression in their struggles to maintain livelihoods with what local assets are left. Nevertheless, Marks notes that they face their hardships with tolerance, integrity, persistence, and humility. The general reader, as well as prehistorians and anthropologists concerned with human evolution and hunting societies, will find this volume useful. It will also be of interest to wildlife managers and ecologists.

This is the ultimate guide to big mammals of the Rocky Mountains—Elk, Grizzly Bears, Wolves, Bison, Black Bears, Moose, Bighorn Sheep, Mountain Lions, and Whitetail Deer. This book offers up substantive yet easily digestible information on these big mammals, from where they live to what they prey on to how they communicate and more. More than 400 full-color photographs throughout make this a keepsake reference for years to come.

Heavily illustrated with color photographs, Arkansas Mammals is the comprehensive guide to the state ' s mammal population. Endangered or threatened species of mammals and missing species known to have been present in recent times are discussed, along with non-native species that have become an important part of the mammal fauna in Arkansas and adjacent states.

This report provides a detailed snapshot of our nation's passion for wildlife and nature. It serves as a road map to guide efforts to reach more Americans to provide them with opportunities to hunt, fish, and enjoy America's wildlife and wild places. Bird/wildlife watching, hunting, fishing are not just favorite pastimes, but they share revenues from sale of licenses and tags, as well as excise taxes paid by hunters, anglers, and shooters to continue to support vital wildlife and habitat conservation efforts in every state. The report outlines the details for compilation of information and surveys to different populations and provides highlights along with statistical information represented in tables from the data collected. Hunting big game like deer, moose, elk, bear, and wild boar challenges both the mind and the body. The opportunity to match wits with wild animals while minimizing danger and respecting their habitat makes hunting both a thrill and a responsibility. This guide provides readers with basic strategies and the advice necessary to participate in this activity, which has been around since the dawn of civilization. It covers everything from purchasing weapons and abiding by laws and regulations to learning about animal habitats and strategies for stalking and tracking big game. Your developing hunters will learn how to safely, responsibly, and effectively enjoy this pastime.

Organ, James Peek, William Porter, John Sandlos, James A. Schaefer  
Hoffmeister (natural history-emeritus-U. of Illinois) presents the culmination of a lifetime of work. Here are 55 color and 192 bandw photos, drawings, distribution maps, and detailed keys. A model of natural history writing. Annotation copyrighted by Book News, Inc., Portland, OR

From reviews of previous editions: " This is the standard reference about Texas mammals. " —Wildlife Activist " A must for anyone seriously interested in the wildlife of Texas. " —Texas Outdoor Writers Association News " [This book] easily fills the role of both a field guide and a desk reference, and is written in a style that appeals to the professional biologist and amateur naturalist alike. . . . [It] should prove useful to anyone with an interest in the mammal fauna of Texas or the southern Great Plains. " —Prairie Naturalist The Mammals of Texas has been the standard reference since the first edition was coauthored by William B. Davis and Walter P. Taylor in 1947. Revised several times over the succeeding decades, it remains the most authoritative source of information on the mammalian wildlife of Texas, with physical descriptions and life histories for 202 species, abundant photographs and drawings, and distribution maps. In this new edition, David J. Schmidly is joined by one of the most active researchers on Texas mammals, Robert D. Bradley, to provide a thorough update of the taxonomy, distribution, and natural history of all species of wild mammals that inhabit Texas today. Using the most recent advances in molecular biology and in wildlife ecology and management, the authors include the most current information about the scientific nomenclature, taxonomy, and identification of species, while also covering significant advances in natural history and conservation.
