Microsoft Visio - Overview. Computer diagramming is the process of creating scalable diagrams on a PC that can be used in various applications such as layout design, organization charts, timelines, floor plans and even prototype software user interfaces. Diagrams are made of shapes, objects and stencils, which when combined together correctly, can help project a lot of useful information.

## Microsoft Visio - Quick Guide - Tutorialspoint

Microsoft Visio is an enterprise class software that is used by professionals to create diagrams of varying complexities – from networking diagrams to floor plans, and even org charts and timelines. However, Visio is also gaining traction among home users for planning their home layouts or simple layout plans.

Micro Saint Sharp is a general purpose, discrete-event simulation software tool. Micro Saint Sharp's intuitive graphical user interface and flow chart approach to modeling make it a tool that can be used by generalists as well as simulation experts. Micro Saint Sharp has proven to be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry. The user manual has been updated for software version 3.8. Some new features are the ability to add swim lanes to any network background, data exchange capability with the UML/SysML tool MagicDraw, and a updated version of the built-in OptQuest optimization.
