First developed in the early 1980s by Lenstra, Lenstra, and Lovasz, the LLL algorithm was originally used to provide a polynomial-time algorithm for factoring polynomials with rational coefficients. This book is an exploration of nonviolent strategies and tactics that have been used to prevent and end civil wars, invasions, and occupations. The problem of war is examined in light of efforts to transform destructive conflict into constructive conflict. Research into alternatives has produced a corpus of knowledge that enables civil society increasingly to expect success when it engages decision-makers in peaceful conflict resolution. The book asks the reader to consider the questions of social conflict using a cost-benefit analysis—which can reveal the advisability of strategic nonviolence. Research into the causes and correlates of war is robust, and when that research is applied to comparisons of conflict management methods, numerous conclusions about potential strategies for ending war emerge.

Therese Borchard may be one of the frankest, funniest people on the planet. That, combined with her keen writing abilities has made her Beliefnet blog, Beyond Blue, one of the most trafficked blogs on the site. BEYOND BLUE, the book, is part memoir/part self-help. It describes Borchard's experience of living with manic depression as well as providing cutting-edge research and information on dealing with mood disorders. By exposing her vulnerability, she endears herself immediately to the reader and then reduces even the most depressed to laughter as she provides a companion on the journey to recovery and the knowledge that the reader is not alone. Comprised of four sections and twenty-one chapters, BEYOND BLUE covers a wide range of topics from codependency to addiction, poor body image to postpartum depression, from alternative medicine to psychopharmacology, managing anxiety to applying lessons from therapy. Because of her laser wit and Erma Bombeck sense of humor, every chapter is entertaining as well as serious.

"As soon as he began publishing fiction more than three decades ago, Charles McCarry was recognized as a spy novelist of uncommon gifts" wrote Charles Trueheart in The Washington Post. Tears of Autumn, McCarry's riveting novel of espionage and foreign affairs, was a major bestseller upon its first publication in 1975. Spun with unsettling plausibility from the events surrounding the assassination of John F. Kennedy, and featuring Paul Christopher, it's a tour de force of action and enigma. Christopher, at the height of his powers, believes he knows who arranged the assassination, and why. His theory is so destructive of the legend of the dead president, though, and so dangerous to the survival of foreign policy that he is ordered to desist from investigating. But he is a man who lives by, and for, the truth—and his internal compunctions force him to the heart of the matter. Christopher resigns from the Agency and embarks on a tour of investigation that takes him from Paris to Rome, Zurich, the Congo, and Saigon.
