Between the Gates is a manual of self-initiation and liberation that takes the student through the basic methods of experiencing dream states and conscious astral projection, to the ultimate culmination of consciousness--creation of the Body of Light. Between the Gates is for anyone who has ever desired to experience the "afterlife" while still alive, or who has desired to rid themselves of the fear of death. While drawing upon traditional Qabalistic and alchemical sources, the methods presented are applicable to a variety of traditions and schools of thought. Between the Gates functions as an "A to Z" guide to psychic initiation toward higher consciousness, and ultimately, to preparation for the great transition beyond this life and this physical body.

An exquisite exploration of the dark, self-transformative power of the tarot archetypes from a world-renowned artist and tarot enthusiast This is tarot deck and book that will help you plumb the depths of your soul, expose the powerful even frightening aspects of the human psyche, and teach you to cultivate self-realization. Arthur Tausig, the creator of the Alchemical Visions Tarot, is a renowned artist and polymath: a physicist, photographer, filmmaker, and musician whose artwork has been exhibited in 300 exhibitions worldwide. His complex imagery explores the theme of the Hero's Journey throughout the major and minor arcana and reveals often overlooked psychological implications of many of the tarot archetypes. Each card is presented as a key to cultivating self-awareness and self-realization. While the Alchemical Visions Tarot falls in the tradition of the Waite and Marselles decks, it moves past preconceived notions of race of and gender. It is a deck that all serious tarot enthusiasts and spiritual seekers will want to explore for themselves.

God emerges like a hologram in our consciousness and is falsely presented as the champion who will save us from death. Science, with its focused methodology, tells the true story. God is the main character in religion, but he is a figment of the imagination. Humans experience consciousness like amnesia victims: We don't know where we came from or why we are here, and we fantasize that we keep on living after our bodies physically die. Thus humanity turns to religion, a powerful source of consolation and comfort. Science, however, offers some more concrete answers. Author Richard C. Johnson argues that God emerges as an adjunct of human consciousness, where he is conjured up in response to the isolation engendered by self-awareness. Huge conflict results, Johnson explains, because claims about God are made from doctrine rather than observation. The result of these conflicts has consistently been war. In an age of nuclear weapons and terrorism, religious conflict must be deconstructed by honest discussion. Johnson explores this seemingly impossible task and proposes methods by which it can be accomplished. In Religion: The Failed Narrative, Johnson convinces us that irrational religion cannot guide us and that only rational science has proven to be a capable leader.

Shrouded in mystery and misunderstanding, Aleister Crowley is one of the 20th century's most revered occult figures. With The Weiser Concise Guide to Aleister Crowley, readers are given a careful, comprehensive overview of Crowley's life from poet to practicing magician as well as his life's work, including the basic principles and rituals of his magical practices. Set aside your preconceptions and dismiss the rumors. Crowley was certainly a complex, controversial, and colorful man, but the truth is far more interesting than the legend.

According to Dr. Larry Malerba, modern medicine has perfected the short-term technical repair of the physical body at the expense of the long-term psychological and spiritual well-being of the whole person. In Green Medicine he examines this issue and provides a realistic blueprint for wellness and a valuable guide for those seeking deeper and more lasting healing. Written in an accessible style, the book draws on a rich range of fields--physics, philosophy, Jungian thought, shamanism, alchemy, Eastern thought, Western esotericism, sustainability, orthodox medicine--to create a green medical paradigm that represents a powerful integrative medical perspective. Dr. Malerba interweaves case histories from his own practice with innovative concepts from alternative and Western medicine in order to address a number of crucial questions: • What are the personal and environmental costs to the overuse of pharmaceutical drugs? • Is conventional medicine as scientific as it claims to be? • How can conventional doctors and alternative healers begin to work together? • How can individuals transform medicine and become participants in their own healthcare? Green Medicine offers a practical and philosophical basis for building a viable green alternative that draws on the inherent unity of body, heart, mind, soul, and nature. From the Trade Paperback edition.

Craft in Art Therapy is the first book dedicated to illustrating the incorporation of craft materials and methods into art therapy theory and practice. Contributing authors provide examples of how they have used a range of crafts including pottery, glass work, textiles (sewing, knitting, crochet, embroidery, and quilting), paper (artist books, altered books, book binding, origami, and zines), leatherwork, and Indian crafts like mendhi and kolam/rangoli in their own art and self-care, and in individual, group, and community art therapy practice. The book explores the therapeutic benefits of a range of craft materials and media, as well as craft's potential to build community, to support individuals in caring for themselves and each other, and to play a valuable role in art therapy practice. Craft in Art Therapy demonstrates that when practiced in a culturally sensitive and socially conscious manner, craft practices are more than therapeutic--they also hold transformational potential.
