December 21, 2012: will the world really change forever on this date, the end of a 5,125-year calendar last used over a thousand years ago? Certainly Hollywood would like you to think so. Did psychedelics facilitate the Maya "Cosmovision"? Should we worry about Earth Crustal Displacement? What the hell is "Planet X"? Uniquely amongst a vast array of 2012 literature, this book features interviews with the leading experts—including Graham Hancock, John Major Jenkins, Daniel Pinchbeck and many others—and insightful, detailed analysis of the broad spectrum of opinion, debate, research and myth regarding the most compelling "end times" prediction of the 21st century.

Does the end of the Mayan Calendar start the countdown to Judgment Day? Biblical and historical researcher David Montaigne concludes that this is the case. He says that the end of the Mayan Long Count is the official start of the Bible's seven-year tribulation-both were focused on the same astronomical events that occur from 2012 to 2019. The world as we know it will be gone by 2020. Texts from ancient India tell us about great cycles of destruction. The Egyptians told the same basic story with different names. The Maya reveal another version of the story, and were very clear about the timing of events from December 2012 to 2019. Your average American is no expert on

these cultures, but most people do have a Bible at home-and the clearest details on what is about to happen can be found in the Bible, if you don't let someone else tell you which parts you should focus on. No, this isn't what you were taught in Sunday school. Religious leaders guide us between the raindrops of curious comments in the Bible. We are discouraged from focusing on the parts they say we weren't meant to understand. But if we stop glossing over these important passages we will understand a flood of details about the End Times. Our "leaders" are not ignorant of these events. The elite already know what is about to happen and they have made preparations most rational people would not believe,

because evidence is suppressed to avoid chaos. They want us to remain ignorant, or at least to believe that the details are secrets that cannot be known. But the coming events (and their timing) are not secrets. Years ago, this book's publication would not have been tolerated by those in power. But by now it doesn't matter much-their plans are not going to be interfered with at this point. Your plans, however, can still be formulated, if you make the choice to understand. Secular and spiritual prophets of doom abound in the information-rich twenty-first century - as they have for millennia. But there has yet to be worldwide floods, meteor impact, global computer failure, obvious alien contact, or direct intervention from God to end the world as we know it. Considering the frequency with which prophecy apparently fails, why do prophecies continue to be made, and what social functions do they serve? This volume gives a concise, but comprehensive, overview of the rich diversity of

prophecy, its role in major world religions as well as in new religions and alternative spiritualities, its social dynamics and its impact on individuals' lives. Academic analyses are complimented with contextualized primary source testimonies of those who live and have lived within a prophetic framework. The book argues that the key to understanding the more dramatic, apocalyptic and millenarian aspects of prophecy is in appreciating prophecy's more mundane manifestations and its role in providing meaning and motivation in everyday life.

devastating earthquakes and volcanoes that obliterate humankind? Will a large-scale science experiment go awry, destroying our civilization? Is Earth on a collision course with an obscure planet? Will any of these events herald the end of the world? Dr. Raymond C. Hundley analyzes the predictions of the ten most prominent apocalyptic theories in the 2012 doomsday movement. He investigates the claims of scientists, theologians, mathematicians, technologists, and ancient prophets along with the credibility and probability of each theory. The 2012 predictions of the Mayan calendar are considered alongside the parallel calculations of 16th century astrologer Nostradamus. Dr. Hundley takes a close

He challenges Christians to respond to these predictions not with fear, but with hope and joy. For believers and nonbelievers alike, Hundley's logical evaluation of Earth's potential demise provides a fascinating road map of where our civilization could be heading and how we can prepare our hearts and minds for what lies ahead.
